07592307258 | United Kingdom

A software developer with over a year of experience specializing in frontend development. Skilled in React, and Firebase, with a focus on creating scalable, efficient, and user-friendly applications. Passionate about learning new technologies. Strong communicator with great problem-solving abilities, adaptable to new challenges, and dedicated to delivering building high-quality software solutions.

## Experience

---

### Frontend Developer Internship | [Certificate](#)

Remote | Aug 2024 - Dec 2024

Frontend Simplified

- Integrated REST APIs into a dynamic NFT website using React and Firebase, improving API response times by up to 20%.
- Engineered and deployed visually engaging UIs for over 500 users, leveraging carousel libraries, data pagination, and responsive design. Utilized React Query for efficient data fetching and caching, eliminating unnecessary re-fetching.
- Monitored and maintained a 99.99% uptime by using Vercel logging and CI/CD deployment pipelines.
- Implemented Git Flow branching strategy, streamlining development and deployment processes, reducing manual efforts by 100%.
- Collaborated with a senior developer to ensure high-quality, well-tested, and maintainable code, achieving 80% code coverage with Jest and React Testing Library. Demonstrated effective communication and collaboration skills within a remote team.

### Freelance Frontend Developer

Remote | June 2024 – July 2024

Self Employed

- Developed a responsive portfolio website using semantic HTML5 and modern CSS3 techniques to showcase the client's social media marketing projects and achievements
- Created a clean, user-friendly layout tailored to showcase real-world campaigns and achievements effectively.

## Projects

---

### Netflix Clone | [Website](#) | [GitHub](#)

- Built a responsive movie streaming app using React with genre-based categorization.
- Integrated external APIs for movie data and YouTube trailer playback.
- Implemented user authentication and interactive browsing features.

### YouTube Clone | [Website](#) | [GitHub](#)

- Developed a video browsing platform with search and profile navigation.
- Integrated APIs for categorized video display and recommendations.
- Enhanced UX with profile pages and recommended video sections.

### CinePlay | [Website](#) | [GitHub](#)

- Created a movie app with sorting options and dynamic favourites.
- Added interactive features like heart icons and loading states.
- Displayed movies dynamically using responsive React components.

## Education

---

### Frontend Developer Bootcamp

Jan 2024 – Current

Frontend Simplified

### Certificate of Completion: Frontend Developer Internship

Dec 2024

Frontend Simplified
